

Important:

Correct life saving equipment should not be ignored or refused because of cost!

DEFIBRILLATION (AED)

Target Audience:

With the introduction of modern Automated External Defibrillators (AEDs) into many workplaces and public areas in the UK, it is possible for trained personnel to administer defibrillation safely at a very early stage. This short course gives your staff the confidence and knowledge to offer the definitive treatment for a Cardiac Arrest and should significantly reduce the mortality rate associated with an out of hospital collapse.

The Objectives / Learning

Outcome:

This course has specific information for the treatment of Cardiac Arrest within a work place setting.

Pre-Requisite:

Awareness of CPR Protocols will be an advantage.

Course Details:

There is a maximum of 8 places available.
Validation of Certification: 1 year.
Course Duration: 3 hours.

Course Content:

- Respond to the needs of a collapsed adult casualty in suspected cardiac arrest with basic life support
- Respond to the needs of an adult casualty in cardiac arrest with Automated External Defibrillation

Assessment:

- Resuscitation Practical Assessment
- AED Practical Assessment
- Multi – Choice Paper (20 Questions)
- Full course attendance

Course Materials:

All students will receive a course book; and certificates will be forwarded upon successful completion of the course.
